VIA DELLE FOGLIE

This architectural floor plan depicts a complex building layout with several interconnected wings. The plan is characterized by a central horizontal corridor system that branches into various rooms and parking areas. Key features include:

- Rooms and Spaces:** Numerous rooms are labeled 'MAG.' (likely magazines or offices), 'CORRIDOIO' (corridors), 'ATRIO' (atriums), and 'GARAGE' (parking spaces). The layout includes multiple levels, as indicated by staircases and elevators.
- Orientation and Boundaries:** Red dashed lines and arrows indicate the building's orientation and boundaries. A red arrow labeled 'A' points upwards, while a red arrow labeled 'S' points downwards. A red arrow labeled '3' points to the right, and a red arrow labeled '2' points to the left.
- Structural Details:** The plan shows structural columns, walls, and doors. Staircases and elevators are clearly marked, providing access between different levels of the building.
- Layout Complexity:** The building has a non-linear, zig-zagging form. It features a central horizontal section with several vertical extensions on both sides. The right side of the plan shows a more organized grid-like structure with multiple rows of rooms and parking spaces.

The overall design suggests a functional building, possibly a government or institutional structure, given the presence of multiple levels, corridors, and parking areas. The use of red dashed lines and arrows highlights the building's footprint and orientation within its context.
